

The distance you may travel

*Let our time machine...
Take you there!*

in one hour ...

Make Time Fly In Your Favor...

*Let us help improve productivity
for you and your staff through
more efficient and cost effective
travel management.*

State government has been challenged to increase productivity and efficiency with fewer resources and employees. This challenge has forced state officials and employees to explore options that will save time, money and improve productivity.

When planning travel, DMB guidelines specify that all costs including staff time, meals, and lodging should be considered when selecting a mode of transportation. After making this comparison, use of state aircraft will frequently be the most cost effective and efficient choice.

In most cases, Air Transport can provide competitive cost while reducing nonproductive time and increasing efficiency. As an example, here is a cost comparison for two people (each @ \$40.00/hr wages & benefits) to attend a three hour meeting in Marquette.

State Aircraft

| | |
|---------------------------------|--------------|
| Aircraft Charge | \$ 945.00 |
| Travel Time (3 hours @ \$80/hr) | 240.00 |
| Meal Allotment | <u>14.50</u> |
| Total Cost | \$ 1,199.50 |

Airlines

| | |
|--|--------------|
| Ticket Cost (\$318 x 2) | \$ 636.00 |
| Travel Time (based upon current schedule 13 hrs @ \$80/hr) | 1,040.00 |
| Meal Allotment | <u>47.00</u> |
| Total Cost | \$ 1,723.00 |

Automobile

| | |
|-------------------------------------|---------------|
| Automobile Charge (.27 x 782 miles) | \$ 211.14 |
| Travel Time (16 hrs @ \$80/hr) | 1,280.00 |
| 1 Night Lodging (2 @ \$60/night) | 120.00 |
| Meal Allotment (2 days) | <u>123.00</u> |
| Total Cost | \$ 1,734.14 |

MDOT's Bureau of Aeronautics has been flying state employees on business since the 1930's. In the last 30 years our state aircraft have logged over 30 million injury free miles, miles without heavy traffic, stop lights, detours, lost baggage, or missed connections.

... that's flying safely!

The seating arrangement and privacy of our aircraft allows productive work time while en route that is not available with other modes of transportation. Increased productivity, morale, and employee efficiency are immediately realized.

... that's time management!

Cruising at speeds ranging from 150 to 300 mph, these modern, well-equipped aircraft turn long overnight stays into short daytime trips.

... that's cost effective!

Come fly with us!

Let us take you there quickly, safely, and securely. You will arrive at your appointment refreshed and ready to work.
